## Developmental Disability Inclusive Healthcare Provider Resource Survey

**Sent to: Mercy Care DD** 

We need your help and are asking for about 5-10 minutes to complete this survey.

It is often difficult for adults with intellectual and developmental disabilities (IDD) to connect with healthcare providers and environments that are welcoming and invested in their specific needs. The purpose of this brief survey is to gather references, in order to create a listserv of Arizona providers that identify as being inclusive toward adults with IDD. The resource will be used by patients looking for providers, in addition to other providers looking to refer their patients.

Please click on the link <u>Developmental Disability Inclusive Healthcare Provider Resource Survey</u> to access the survey itself.

There are no consequences to not participating in the survey and responses will not be used as an evaluative measure. This project is primarily led by University of Arizona fourth-year medical student, Corinne Winsten, with the support of the DAME Collaborative. It is open to all provider types.

Your time responding to the following questions is deeply appreciated.

Thanks for all you do!
